

USAID LAUNCHES NEW WEBSITE

The U.S. Agency for International Development's Mission in Mozambique (USAID/Mozambique) is proud to announce the launch of its new website (<http://www.usaid.gov/missions/mz>). The site will provide a broad range of information in English and Portuguese on USAID's program in Mozambique, the country, success stories, and newsworthy development items. Visitors will find information on procurement opportunities, press releases, speeches, employment opportunities, contact information, and much more. There will also be links to a number of other informative and relevant sites.

The website is one of several projects USAID/Mozambique is undertaking as part of a new Outreach and Communication Strategy. This strategy is being carried out to increase awareness and understanding about the positive impact United State's development assistance is having in Mozambique.
